alkus AG establishes partner programme

MEVA is the first partner | Ceremonial handover of certificate in Haiterbach

Handover of the first certificate for the newly established alkus AG partner programme took place in Haiterbach on Monday 11 February 2019. Certificate recipient was MEVA Schalungs-Systeme GmbH.

Elvis Kaljic, CEO of alkus AG, presented the partner certificate to Florian F. Dingler – managing director of MEVA Schalungs-Systeme GmbH – during a festive ceremony at the MEVA headquarters in Haiterbach. This means the long-standing business relationship between the two companies has now been given an official seal of approval. The formwork systems of the Haiterbach-based company have been equipped as standard with the alkus® solid plastic panel since as far back as 2000.

alkus AG maintains business relationships with well-known formwork manufacturers who already use alkus® in their systems. This is possible since the alkus® solid plastic panel is supplied ready for installation in the respective system and fits into the formwork of every manufacturer. The new programme was the next logical step for CEO Kaljic: “The official partners agree to include alkus® throughout their rental portfolio. This allows us to offer them exclusive purchasing terms and conditions,” explains the 40-year-old. “At the same time, the title reinforces the manufacturers’ commitment to provide excellent advice and support to end customers when using alkus®.”

Meeting these conditions was not a problem for MEVA, which has been benefiting from the advantages of the alkus® solid plastic panel for many years. “We’ve never regretted our decision to replace vulnerable plywood panels with alkus®,” says Florian F. Dingler. “The wood-free panels ensure consistently high-quality concrete surfaces and basically last forever – we’ve never yet had to make use of the extensive 7-year warranty. Our customers are also very satisfied. Obviously, this is a crucial factor for me as the managing director.”

alkus AG plans to further expand the official partner programme in the coming months and to convert existing business relationships with formwork manufacturers into official partnerships.

About alkus AG

alkus AG, based in Vaduz (Liechtenstein), markets the alkus® solid plastic panel together with specially adapted accessories and offers its customers technical support. The alkus® solid plastic panel is principally used as a formwork panel in the construction industry where it has proven successful due to its economic and practical advantages over timber panels. It fits into every frame and can, due to its stability and flexibility, also be used for tunnel construction and special formwork systems as well as the construction of precast concrete units.

About MEVA Schalungs-Systeme GmbH

MEVA is a family owned and managed manufacturer of formwork technology with an international profile. It is based in Haiterbach in the northern Black Forest region of Germany. Much of what is seen as standard in the formwork industry today was developed by MEVA. As a driving force in the industry, MEVA works to make formwork even safer, more efficient and simpler for users. Needless to say, excellent product and technology quality is a top priority.
