

alkus Comfodeck panel

Light. Long-lasting. Sustainable.

The polypropylene scaffolding panel can be used in all common scaffolding systems. It impresses with its lightweight construction. At the end of its life cycle, it can be fully recycled.

THE BENEFITS IN OVERVIEW

- 

> 2-3x lighter
2-3 times lighter than the same thickness plywood.
- 

> 10+ year lifespan
Easy to maintain, handle, repair.
- 

> Impact resistance
Extreme impact resistance by adding several high fiber layers.
- 

> Tested for load class 4
(3.00 kN/m²). According to SS-EN 12811-3
- 

> Water-resistant
Withstands exposure to moisture
- 

> UV-resistant
Prevents fading and degradation. ISO4892-2:2006 CYCLE 1
- 

> Chemical-resistant
Durable against various substances
- 

> Anti-skid surface
R12 Rating according to NEN-En 16165
- 

> Fully customizable
Choose preferred size, thickness, edge band, logos
