

## PRESS RELEASE

Ruggell, September 29, 2025

### **Hünnebeck by BrandSafway und alkus AG deepen collaboration**

*Hünnebeck by BrandSafway and alkus AG are strengthening their partnership. The two companies have signed an agreement covering the supply of alkus® formwork panels for several formwork systems from Hünnebeck by BrandSafway and Aluma Systems by BrandSafway. This marks an expansion of the companies' long-standing business relationship.*

Since 2013, Hünnebeck's PLATINUM 100 wall formwork system has been equipped as standard with the alkus® solid plastic formwork panel. In 2021, the MANTO G3 wall formwork system was added. Under the new agreement, the RONDA circular formwork system, the PAX column formwork system, and other systems will also be included in the supply scope.

"Following extensive testing, we decided to use alkus solid plastic panels for our international rental fleets in the MANTO G3, PLATINUM 100, RONDA, PAX, and other systems. The long service life of the alkus® solid plastic panels compared to traditional plywood panels plays a key role in this decision. In addition, the consistently high-quality concrete finishes that can be achieved with alkus® solid plastic panels are an important advantage. Both factors benefit our Hünnebeck and Aluma Systems customers in Europe, the Middle East, India, Latin America, and North America," explains Carsten Stratmann, Regional Vice President Forming & Shoring Europe at BrandSafway.

Daniel Keller, CEO of alkus AG, emphasizes: "With this agreement, we are taking the partnership between alkus and Hünnebeck by BrandSafway to the next level. In addition to supplying ready-to-install panels for the respective systems, we also provide consulting and on-site support for end users working with the alkus® solid plastic panel. This creates a triple win – for the alkus Group, for Hünnebeck and Aluma Systems by BrandSafway, and for their customers!"

### **About alkus AG**

Based in Ruggell, Liechtenstein, alkus AG distributes the alkus® solid plastic panel along with tailored accessories and provides technical support to its customers. The alkus® panel is used as a formwork facing in the construction industry and offers an economical and practical alternative to plywood and wood-plastic composite panels. Supplied as standard in ready-to-install form, it fits into any frame and can also be used in tunnel and special formwork applications or for the production of precast concrete elements thanks to its stability and flexibility. The panel comes with a seven-year long-term warranty and is manufactured exclusively in Europe.

### **About BrandSafway**

Headquartered in Atlanta, USA, BrandSafway is a leading global provider of access, specialized industrial services, and formwork and shoring solutions for the commercial and infrastructure construction sectors. With safety as its top priority, BrandSafway supports maintenance, renovation, new construction, and expansion projects. The company operates a network of more than 40,000 employees across 360 strategic locations in 27 countries.

### **About Hünnebeck by BrandSafway**

BrandSafway encompasses a range of strong, long-established brands that are market leaders in their respective regions and segments. Hünnebeck by BrandSafway, based in Europe, is part of this international group. With roots dating back to 1929, the Hünnebeck name stands for high-quality, flexible, and cost-efficient formwork, scaffolding, and safety solutions. In addition, Hünnebeck offers a wide range of project support services, from engineering, site logistics, cleaning and repair services, user training, and formwork supervision to complete project development.
